Kern Audubon Gathering TUES. JANUARY 8, 2008

7:00pm

Kern Co. Supt of Schools 17^{th} & L Streets, Bakersfield

Jihadda Govan, Refuge Biologist

Refreshments served...plus great RAFFLE prizes!

START 2008 WITH

JANUARY 19TH FIELD TRIP Destination: City Treatment Ponds 8:00Am - Mike McQuerry, Leader

Our January field trip will be to the Wastewater Treatment facility ponds, led by Mike McQuerrey, on Saturday, Jan. 19th. We will meet at the facility gate at 8:00 a.m. In addition to the normal, expected birds, many unusual ones have been seen this winter - we hope to be fortunate on this trip! Bring snacks, water, binoculars, warm layers of clothing, etc. Mike has also indicated it is his intention to continue to Hart Park after the treatment plant, so any who desire to continue on with him, might want to bring a lunch. (Hart Park has been very productive recently with many unusual sightings.)

Directions: From Hiway 58, go south on Mount Vernon Ave. to East Planz Rd. Turn West (right) and proceed to the gate on the right. We will park along the road and carpool from there. If you have questions, contact Roger Coley (832-1820)

We thank Joseph V. Higbee for the Audubon's Warbler photo used as the newsletter logo. Used by permission. (www.pbase.com/jvhigbee)

FOR THE BIRDS ...

Ted Murphy and I want to thank everyone who helped make our second annual auction such a success, especially Dawn Bradley, who did the organizing. We had the highest attendance yet since re-organizing in March 2006 with 58! Over \$1000 was raised, Dr. John Wilson made an excellent presentation on wintering birds and bird identification, there was great food and spirited participation in the auction with Willie Stubblefield's welded pelican sculpture generating lots of excitement and a generous donation (thank you, Roger Coley). It was a fun evening and a good way to end 2007!

We want to thank John Wilson and Alison Sheehy for their continued work on the two Christmas Bird Counts in our area (see articles p.5) and to the many KAS members who participated.

We also want to thank our Executive Board for their enthusiasm and faithful work on behalf of the chapter. We are still learning about being an organized chapter of National Audubon as well as how to continue "to create a culture of conservation in Kern County" (our informal chapter motto!).

If you haven't yet attended one of the monthly meetings or gone on a field trip, we hope you will do so in 2008! If you have ideas or questions, call me or Ted or one of the other officers. Keep the Executive Board list handy (p.3) and get in touch. We'd love to hear from you!

Madi Elsea, Co-Chair (661)322-7470

YES...FEEDING THE HUMMINGBIRDS IN WINTER IS IMPORTANT!!

The Anna's Hummingbird winters in our area, so keeping your feeder stocked with sugar water is a good thing for the Hummers. These are suggestions for keeping feeders hummingbird-friendly all year:

K

K

K

K

K

K

K

Feeder Facts from Audubon....

Maintaining a backyard hummingbird feeder can help provide the birds with nectar critical to their survival, especially during the fall when they need to double their body mass before migration. (Contrary to a common fear the extra food won't stop a hummer from migrating south when it's time for it to go.) Follow these steps to ensure your yard is a safe and nutritious stopover for hummingbirds:

- Instead of one large feeder, hang several smaller ones in different locations. Keep the feeders far
 enough apart that the hummers cannot see one another; this will prevent one bird from dominating
 the rest.
- Fill the feeders with sugar water, made by combining four parts hot water to one part white sugar, boiled for one to two minutes. NEVER use honey, which promotes the growth of harmful bacteria, or artificial sweeteners. Also avoid red food coloring.
- Hang your feeders in the shade to discourage fermentation and spoilage of the sugar solution.
- Be sure to change the sugar water regularly before it gets cloudy, or about twice a week in warm weather.
- Clean the feeders with a solution of one part white vinegar to four parts water about once a week. If your feeder has become dirty, try adding some grains of dry rice to the vinegar solution and shake vigorously. The grains act as a good abrasive. Rinse your feeder well with warm water three times before refilling with sugar solution.

11th Annual GREAT BACKYARD BIRD COUNT

Feb. 15 - 18, 2008

We hope many Kern Auduboners participate in the Great Backyard Bird Count, a significant bird monitoring activities hosted by the National Aubudon Society and the Cornell Lab of Ornithology.

What is the GBBC?

The Great Backyard Bird Count is an annual fourday event that engages bird watchers of all ages in counting birds to create a real-time snapshot of where the birds are across the continent. Anyone can participate, from beginning bird watchers to experts. It takes as little as 15 minutes. It's free, fun, and easy--and it helps the birds! For all the information go to the website: www.birdcount.org How to participate:

- 1. Plan to count birds for at least 15 minutes during **February 15–18, 2008.** Count birds at as many places and on as many days as you like—just keep a separate list of counts for each day and/or location.
- 2. Count the greatest number of individuals of each species that you see together at any one time, and write it down.
- 3. Enter your results at www.birdcount.org

Results from 2007:

Total checklists submitted: 81,003 Total species observed: 613 Total individual birds counted: 11,082,387

2008 AUDUBON CALENDARS

A few 2008 Audubon calendars will be available at the January 8th meeting as a chapter fund-raiser. January price is \$10 each with 4 different nature calendars still available:

TUESDAY BIRDERS MEET 3RD TUES.

January 15th will be the next outing of the Tuesday Birders. Beginners as well as the experienced are welcome! Contact Brenda Kyle (871-4867) for information re: time and place.

TEJON RANCH

The Kern chapter of the Calif Native Plant Society invites Kern Audubon and anyone interested in what's happening regarding Tejon Ranch to attend a meeting on Tues. January 15, 7:00pm at Beale Memorial Library (Lake Room). Ileen Anderson, a former Bakersfieldian who now works for the Center for Biological

Wildlife corridors and, especial Condor.

Looking ahead to February...Join us for the February 5th meeting of Kern Audubon!

Looking ahead to February...Join us for the February 5th meeting of Kern Audubon!

Separate Speaker will be Rob Hansen, President of the Tulare Basin Wildlife Partners. Carole Separate Speaker will also be present for the Southern San Joaquin Valley.

Fish and Game Commission Votes to Protect Condors.

California condors can look forward to a happy (and lead-free!) new year in 2008. Audubon's decade-long effort to protect the California condor from lead poisoning has succeeded at last. On December 7, the CA Fish and Game Commission voted 3-1 to adopt new regulations to ban the use of lead ammunition in areas of state that are inhabited by endangered California condors. The new regulation goes further than the recently enacted Condor Protection Act (AB 821), which the governor signed in October, in that it also bans the use of lead in .22 caliber and rimfire ammunition, which were exempted from the legislation. The regulation will take effect on July 1.

Audubon members' calls, letters, and e-mails to legislators, the governor, and Fish & Game Commission members helped secure these major victories.

Landmark Energy Bill Becomes Law.

Audubon won a partial victory on December 19 when the 2007 Energy Bill was signed into law. The bill represents a major step forward in energy conservation by mandating a 40% increase in vehicle fuel efficiency. Cars and trucks sold in the U.S. must achieve an average fuel efficiency of 35 miles per gallon by 2020. Although this fuel efficiency standard is low by international standards—it lags behind Europe, Japan, and China—it still represents a great step forward. It is the first time the U.S. has raised fuel efficiency standards since they were first introduced in 1975! As a result of Audubon's efforts, the bill also contains protections for birds and habitat that could be put at risk from the expansion of biofuels production.

The bad news is that the Renewable Energy Standard (RES), requiring 15% of America's electricity to be generated from renewable sources by 2020 was defeated in the Senate. More work remains to be done to put the United States on a path toward confronting the challenge of global warming. But the Energy Bill was an important—if incomplete—first step.

On H.R. 6, the House version of the Energy Bill which included <u>both</u> increased mileage standards and the RES, Congressman Kevin McCarthy (R) voted NO. Congressman Jim Costa (D) voted YES. Thanks for your calls and letters to these representatives in support of a strong Energy Bill.

Top Ten Things to Be Thankful For

The National Audubon Policy staff put together this list of things we are thankful for. Happy Holidays and a Green New Year to all!

- 10. New leadership in Congress has brought new momentum for getting environmental policy back on track.
- 9. Both the House and Senate passed appropriations bills increasing money for refuges, endangered species recovery, Land & Water Conservation Fund and other important conservation funding.
- 8. We're thankful for a system that encourages citizen participation and an opportunity to comment on: changes to the National Environmental Policy Act, listing the Polar Bear as endangered, clarifying protections for wetlands under the Clean Water Act, and much more.
- 7. The Arctic National Wildlife Refuge is still safe and wilderness legislation to protect it is gaining ground.
- 6. We're thankful for the very positive response from chapters around the country that hosted our Alaska Roadshow, learned more about Alaska, and took action to protect its vast treasures.
- 5. We're thankful that the Bald Eagle, our national symbol, has gone from an all-time low of 417 nesting pairs in 1963 to an estimated high of 9,789 breeding pairs today; the eagles flying the skies of all lower 48 states are proof that the Endangered Species Act works!
- 4. We're five years' thankful for a \$6 Billion authorization for Ecosystem Restoration, and that there is still *something left* to restore.
- 3. We're thankful for the successful Audubon lawsuit that kept oil rigs out of Alaska's Teshekpuk Lake for now; we're still fighting for this wetlands wilderness!
- 2. We're thankful for hearings on global warming in Congress that aim to lead versus mislead.
- 1. We are thankful for our wonderful chapter leaders, activists, volunteers and workshop participants. So many of you responded this past year to our alerts and other appeals for action. You are the best!

Upcoming Bird Festivals...The annual MORRO BAY WINTER BIRD FESTIVAL sponsored by the Morro Coast Audubon Society will be Jan. 18-21, 2008--www.morrobaybirdfestival.org or call (805)772-4677.

2008 Bakersfield Christmas Bird Count

"It was the third highest count of all time. We missed some species, but got some new ones," said Dr. John Wilson, who coordinated the Bakersfield Christmas Count on December 16, 2008.

Participating in the count were Kern Audubon members John Wilson (compiler), Bill Lydecker, David Chilton, Gordon Black, Gary File, Ted Murphy, Dennis and Kathy McDonell, John Lindsay, Barbara Reifel, Ken and Brenda Kyles, Mike MacQuerrey, Kelli Levinson, Debbie Wilson, and Steve Williams. They were assisted by Alison Sheehey, Kern River Preserve, and Gary Woods, Fresno Audubon Society.

Areas searched between 1AM and 4PM included: Hart Park, Lake Ming, Rancheria Road. mouth of the Kern River Canyon, Bakersfield Waste Water Treatment Ponds, and Kern River Parkway (between Stockdale Bridge and Manor Street).

The results were tallied by Wilson, who also compiles the Bakersfield CBC, after dinner at a local restaurant. The preliminary count was 144 species. Three birds, Eurasioan Collared Dove, Clay-colored Sparrow, and Yellow Warbler were FIRSTS for the Count, and Horned Grebe, Hermit Warbler, and Green-tailed Towhee, were seen for the second time.

2008 Buena Vista Christmas Bird Count

The current tally for the Buena Vista Christmas Bird Count is 99 species seen on count day and 3 additional during count week. The number of individuals (and maybe species) will change as the Check the official CBC database on the National compiler receives one final area report. Audubon website later in the month to get the final count. Areas covered were Buena Vista Aquatic Recreation Area, portions of the Calif Aqueduct, Tule Elk Reserve, and the Kern Water Bank (& Tupman).

Participants were: Alison Sheehey (compiler), David Chilton, Susan Colletta, Frank Gibson, Xiaohong Huang, Bill Lydecker, Bill Moffat, Barbara Reifel, Holly Sorenson, and David Wimpfheimer. Steve Glover from Dublin, CA was not on the count but reported three new species on Christmas eve that have been added to the count week: Red-necked Grebe, Mountain Chickadee, and Red-naped Sapsucker (count week runs the three days prior to and three days after the official count day). His rarities have caused many birders from around the state to come and bird the lake over the past week with several record birds being seen.

Check out the KernCoBirding vahoo group to see all of the exciting birds that have been reported recently.

Those interested in seeing photos of some of the birds from count day can go to www.natureali.org/CBCs/BVcbc.htm.
